

# **CROSS49 SUPPLIES & RENTALS** **MOBILE WAREHOUSES**

**CONSTRUCTION • PIPELINE • MINING • RAILWAY • OIL & GAS TURNAROUNDS**

Cross49 offers a range of mobile warehousing solutions that are designed to meet the needs of the American construction industry. These mobile warehouses can be placed onsite and are fully customizable to suit the specific requirements of each customer. From a single stocked seacan to a multiple trailer system, Cross49 can design and deploy a mobile warehouse layout that perfectly meets the user's needs.

In addition to providing supplies and consumables directly to the contractor, mobile warehouse customers also have access to Cross49's rental fleet. This rental fleet offers a wide variety of equipment, including light towers, pumps, Marooka carriers, and more, which can be delivered directly to the jobsite.

By customizing the warehouse inventory to suit the workers' needs and replenishing it as required, Cross49 eliminates the need for workers to leave the jobsite in search of supplies. This helps to increase jobsite efficiency and reduce downtime, which ultimately leads to cost savings for the contractor.

Cross49's mobile warehousing solutions provide a convenient, cost-effective, and customizable solution for managing inventory and equipment on construction, pipeline, and mining sites.
