

CROSS49 SUPPLIES & RENTALS PORTABLE WASH PADS

PIPELINE • CONSTRUCTION • MINING

- System consists of four 8' x 20' sections and four individual ramps.
- Sections fasten together with chains to allow system to contour with the ground.
- 3500 gallon capacity of fluid and solid containment.
- Side curtains prevent over spray.
- Rubber seals connect each section for 100% fluid containment.
- 2" hose connection to allow for fluid equalization or for skimming fluid off.
- 150,000 lbs. weight rating.
- Solid metal surface will withstand any tracked machine including ice lugs in the winter.
- Can be heated by using glycol heaters to keep water from freezing in the winter.
- Complete system weighs approximately 42,000 lbs.
- Can be unloaded, set up, and ready to wash in 45 minutes.
