

CROSS49 SUPPLIES & RENTALS DEMAGNETIZATION

PIPELINE • FACILITIES

IDMAG DEMAGNETIZATION SYSTEM

The IDMAG system is easy to deploy and simple to operate. It is powered by 120V-250V, 50/60Hz, single phase power which allows it to be used at almost any location. The IDMAG system is built to work. It is weather, dust and crush resistant and can be used in the toughest of conditions.

- Fits Multiple Pipe Diameters
- Portable and Lightweight
- Single Phase, 50/60hz operation
- Water, Dust and Crush Resistant
- Sealed Panel and Switches
- Simple Interface
- Expandable for More Power
- Use on Valves, Vessels & Plates

WESTERN INSTRUMENTS DEMAGNETIZATION

WD-Series Coils are currently available in many ID sizes (8 5/8", 10 3/4", 14", 16", 18", 25", 32", 38", 44" 50", and 60" ID). Demagnetization takes less than 2 minutes per end and remains demagnetized for several days, to an acceptable level for Welding of +/-2 Gauss.

- Fits Multiple Pipe Diameters
- 14" 115V-6HZ
- 25" 230V-50HZ
- 38" 230V-60HZ
