

CROSS49 SUPPLIES & RENTALS ROLLERS, CRADLES & SLINGS

CONSTRUCTION • PIPELINE

HDD ROLLERS

Horizontal Directional Drilling (HDD) Rollers support pipe as it travels smoothly towards its destination, eliminating the need for manual transport.

PULL HEADS

Our Cross Country Canada certified engineered pullheads attach to the end of pipe to pull through boreholes. Commonly used in small-diameter directional drilling for easy installation.

ROLI CRADLES & SLINGS

Slings for pipe sizes 2"-24" with evenly spaced urethane rollers. Cradles for pipe sizes 6"-60" with load capacity designed for safe handling of heavy walled pipes.

POWERED ROLLERS

Comes with geared height adjustability which provides smooth transitions even when the pipe support is under a load.

HDD CONICAL ROLLERS

HDD Conical Rollers help to minimize drag forces of pipe-pulling through horizontally drilled or bored holes.

PNEUMATIC TIRE CRADLES

Cross Country Canada can provide pneumatic tire cradles to assist in pipe handling and lowering in operations to not only protect the pipe but assure a smooth guide.

LOWERING-IN BELTS

Heavy-duty nylon webbing for durability and strength with alloy steel end irons for greater strength with less weight.
